## CIP PK 22-34 SHILLING PARK PROJECT

CITY COUNCIL REGULAR MEETING

ITEM 5.2

OCTOBER 11, 2021

# CITY OF LATHROP CIP PK 22-34 SHILLING AVENUE PARK PROJECT

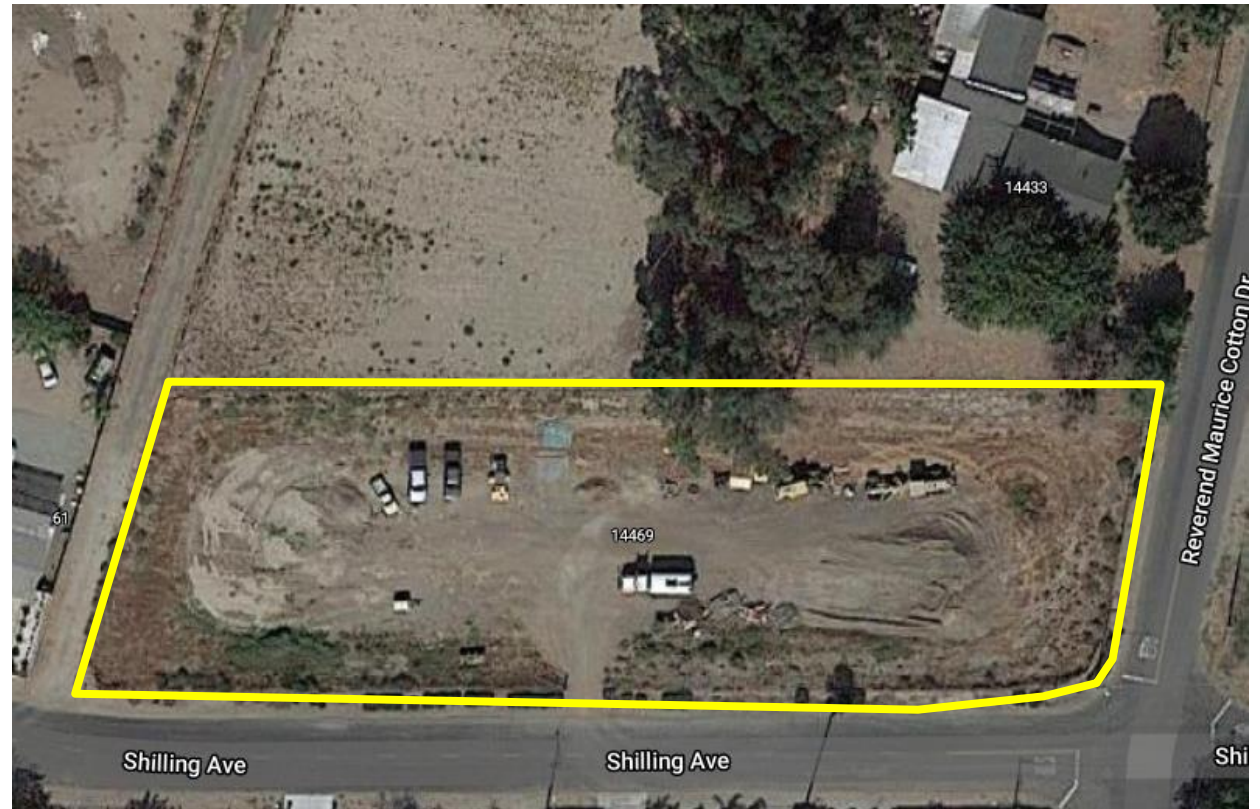

## Shilling Avenue Retention Basin

Currently the City owns a 1 acre parcel (APN 19605020) on the corner of Shilling Avenue and Reverend Maurice Cotton Drive. The parcel at this location is a storm water retention pond that provides flood protection for the neighborhood in this area.

As a storm water retention basin storm water collects at this location and remains until it dissipates through the soil into the ground water table. Approval of this project would allow staff to conduct an engineer's report of this retention basin to see what improvements could be made without negatively impacting the flood protection of the area or if storm waters could be rerouted to the storm drain system to allow for onsite improvements.

Based on the engineer's report design options will be created that will allow staff to bid project and return to Council for the approval of construction documents.

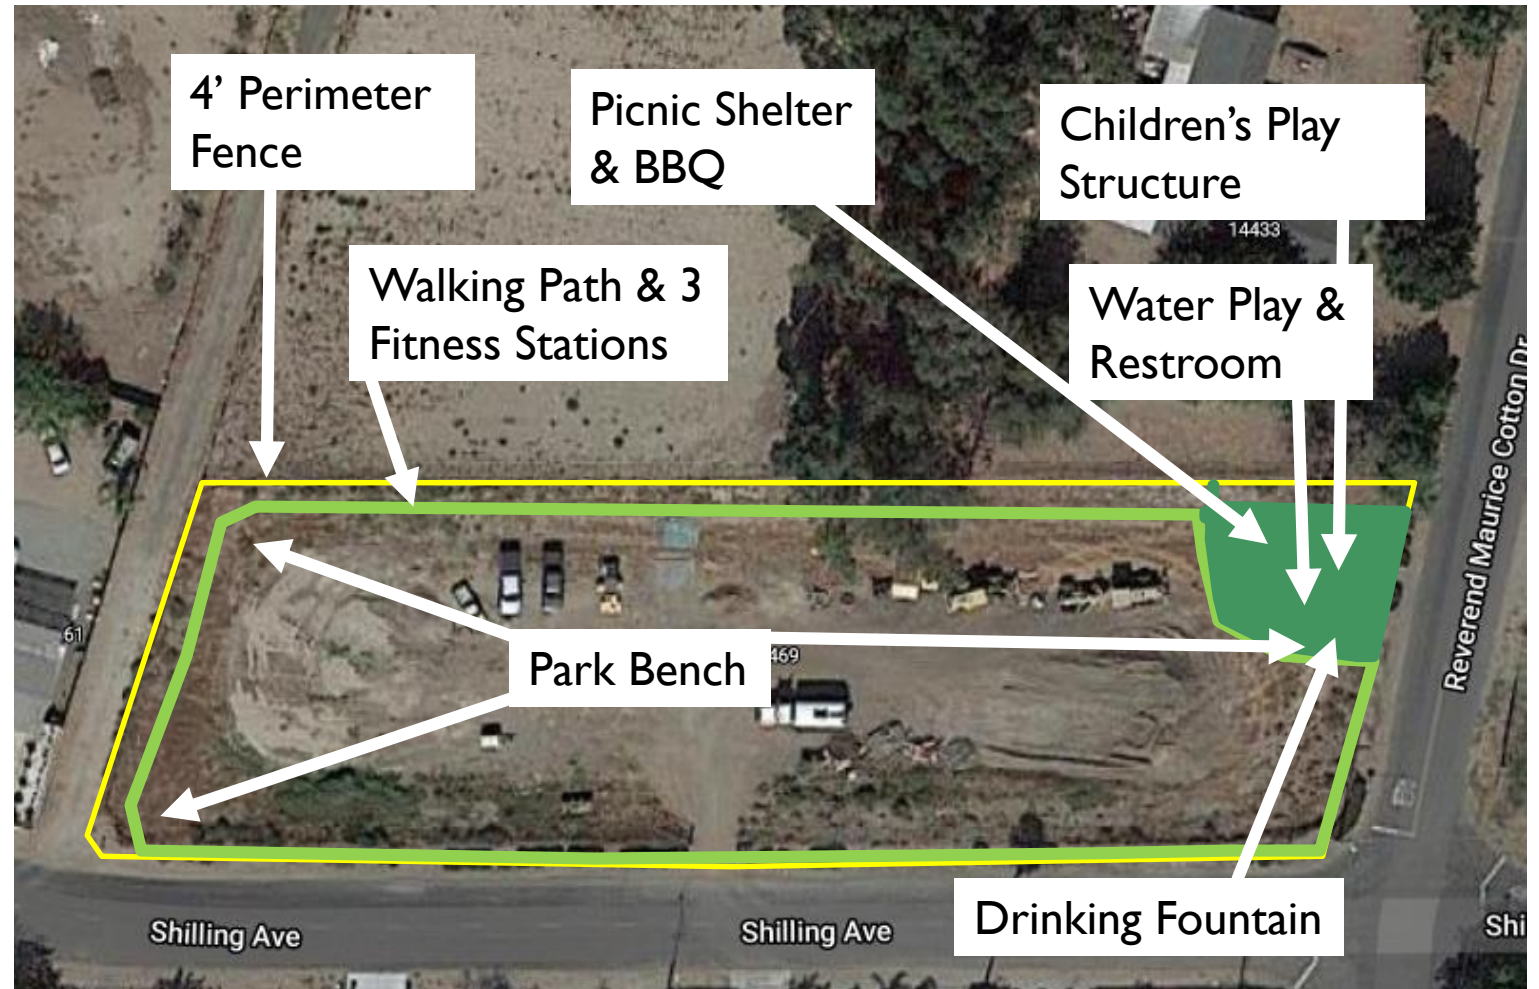

# CITY OF LATHROP CIP PK 22-34 SHILLING AVENUE PARK PROJECT

## Shilling Avenue Park Project

Proposed items for inclusion in design

- Perimeter Walking Trail with 3 Fitness Stations
- Small Children's Play Structure
- Water Play Fountain
- Single Unit Restroom
