CITY MANAGER'S REPORT SEPTEMBER 12, 2022 CITY COUNCIL REGULAR MEETING

| ITEM: | PUBLIC HEARING (PUBLISHED NOTICE) TO CONSIDER ADOPTION OF THE REGIONAL URBAN LEVEL OF FLOOD PROTECTION DEVELOPMENT LEVEE IMPACT FEE IN THE MOSSDALE TRACT AREA |
|-----------------|--|
| RECOMMENDATION: | City Council to Consider the Following: 1. Hold a public hearing; and 2. Adopt a Resolution Approving the Regional Urban Level of Flood Protection Development Levee Impact Fee in the Mossdale Tract Area |

SUMMARY:

During the September 12, 2022 City Council meeting, staff will recommend that Council approve the San Joaquin Area Flood Control Agency's Mossdale Tract Area Regional Urban Level of Flood Protection Development Impact Fee Update Nexus Study. If approved, City Council has taken the first step in implementing an updated San Joaquin Area Flood Control Agency (SJAFCA) Mossdale Tract Area Regional Levee Impact Fee Program. The updated Nexus Study (Attachment "B") provides the basis for the proposed Regional Levee Impact Fee to ensure that new development pays its proportionate share of the levee improvement costs needed to provide Urban Level of Flood Protection (ULOP) to the Mossdale Tract Area.

If Council approves the Nexus Study, the next step is to approve the Regional ULOP Development Impact Fee by resolution. Staff requests that City Council hold a public hearing, consider all information and public testimony and, if determined to be appropriate, adopt a resolution approving the Regional ULOP Development Impact Fee.

BACKGROUND:

During the September 12, 2022 City Council meeting, staff will recommend that Council approve the San Joaquin Area Flood Control Agency's Mossdale Tract Area Regional Urban Level of Flood Protection Development Impact Fee Update Nexus Study. If approved, City Council has taken the first step in the process of implementing an updated San Joaquin Area Flood Control Agency (SJAFCA) Mossdale Tract Area Regional Levee Impact Fee Program. The updated Nexus Study (Attachment "B") provides the basis for the proposed Regional Levee Impact Fee to ensure that new development pays its proportionate share of the levee improvement costs needed to provide Urban Level of Flood Protection (ULOP) to the Mossdale Tract Area.

CITY MANAGER'S REPORT SEPTEMBER 12, 2022 CITY COUNCIL REGULAR MEETING PUBLIC HEARING (PUBLISHED NOTICE) TO CONSIDER ADOPTION OF THE **REGIONAL ULOP PROTECTION DEVELOPMENT LEVEE IMPACT FEE IN THE MOSSDALE TRACT AREA**

If Council approves the Nexus Study, the next step is to approve the Regional ULOP Development Impact Fee by resolution. The Nexus Study presents a fee that is calculated on a Gross Developable Acreage (GDA) basis versus a square footage basis. As such, the required AB 602 exemption findings are presented in the Nexus Study.

Tables 1 and 2 below summarize the proposed Regional ULOP Development Impact Fee rates compared to the current fee rates in effect today.

TABLE 1 – Proposed Rates for Adoption

| Land Use | Fiscal Year 20/21 Regional Fee Rates <i>(Per GDA)</i> | Updated Regional Fee Rates (Per GDA) | Change from Current Rate |
|--|---|---|--------------------------------|
| Single Family Residential Multi-Family | \$19,428 | \$22,106 | 14% |
| Residential Commercial Industrial | \$17,691 \$18,399 \$15,309 | \$20,686 \$20,916 \$16,384 | 17% 14% 7% |

TABLE 2 - Demonstrative Rates on Per Unit Basis

| Land Use | Basis | Fiscal Year 20/21 Regional Fee Rates | Updated Regional Fee Rates | Change from Current Rate |
|----------------------------------|--------------------|---|----------------------------------|-----------------------------------|
| Single Family Residential [1] | Per Unit | \$3,169 | \$3,770 | 19% |
| Multi-Family Residential | Per Unit | \$922 | \$1,095 | 19% |
| Commercial [3] | Per 1,000 SF | \$1,442 | \$1,713 | 19% |
| Industrial [4] | Per 1,000 SF | \$1,113 | \$1,053 | -5% |

[1] Current assumption is 6.13 units per GDA. Proposed assumption is 5.86 units per GDA.

[2] Current assumption is 19.19 units per GDA. Proposed assumption is 18.89 units per GDA.

[3] Current assumption is 12,763 SF per acre. Proposed assumption is 12,207 SF per acre.

[4] Current assumption is 13,756 SF per acre. Proposed assumption is 15,553 SF per acre.

CITY MANAGER'S REPORT PAGE 3 SEPTEMBER 12, 2022 CITY COUNCIL REGULAR MEETING PUBLIC HEARING (PUBLISHED NOTICE) TO CONSIDER ADOPTION OF THE REGIONAL ULOP PROTECTION DEVELOPMENT LEVEE IMPACT FEE IN THE MOSSDALE TRACT AREA

REASON FOR RECOMMENDATION:

Approval of the Regional ULOP Development Impact Fee is the final step implementing an updated SJAFCA Mossdale Tract Regional Levee Impact Fee Program. The purpose of the update is to reflect changes and refinements in SJAFCA's financing plan for 200-year ULOP levee improvements for the Mossdale Tract. Amendments to the SJAFCA Collection Agreement include the incorporation of terms related to the Mossdale Tract EIFD.

Staff recommends that City Council hold a public hearing, consider all information and public testimony and, if determined to be appropriate, adopt a resolution approving the Regional ULOP Development Impact Fee.

FISCAL IMPACT:

The creation of the Regional Urban Level of Flood Protection Development Impact Fee, as collected by the local land use agencies, is expected to generate approximately \$71.44 million to be used to partially fund the required improvements to Mossdale Tract Area Levee System. Complete funding for the required improvements will require additional funding sources as described in the 2021 Adequate Progress Report.

RESOLUTION 22-

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LATHROP APPROVING THE REGIONAL URBAN LEVEL OF FLOOD PROTECTION DEVELOPMENT LEVEE IMPACT FEE IN THE MOSSDALE TRACT AREA

WHEREAS, the Mitigation Fee Act (the "Act") (California Government Code Section 66000 *et seq*.) authorizes a local agency to impose impact fees as a condition of approval of development projects to help defray the costs of public infrastructure and facilities that will be needed to serve the proposed development; and

WHEREAS, the San Joaquin Area Flood Control Agency ("SJAFCA") has directed Larsen Wurzel & Associates, Inc. to prepare the Mossdale Tract Area Regional Urban Level of Flood Protection ("ULOP") Development Impact Fee Update dated May 12, 2022 ("Nexus Study"), and

WHEREAS, section 6602(a) of the Act, notice was published in the Manteca Bulletin on September 2nd and 8th, 2022, providing 10 days' notification of the time and place for a public hearing to consider and adopt the Regional ULOP Development Impact Fee Update. Notice of the hearing was also provided 14 days prior to the public hearing to those interested parties who requested, in writing, notice of meetings on new or increased fees or service charges; and

WHEREAS, a public hearing was held on September 12, 2022 at a regularly scheduled meeting of the Lathrop City Council (the "Council") to hear and consider the adoption of the Regional ULOP Development Impact Fee; and

WHEREAS, the Nexus Study presents a fee that is calculated on a Gross Developable Acreage (GDA) basis versus a square footage basis. As such, the required AB 602 exemption findings are presented in the Nexus Study.

Tables 1 and 2 below summarize the proposed Regional ULOP Development Impact Fee rates compared to the current fee rates in effect today.

TABLE 1 – Proposed Rates for Adoption

| Land Use | Fiscal Year 20/21 Regional Fee Rates <i>(Per GDA)</i> | Updated Regional Fee Rates (Per GDA) | Change from Current Rate |
|-----------------------------|---|---|--------------------------------|
| Single Family | | | |
| Residential Multi-Family | \$19,428 | \$22,106 | 14% |
| Residential | \$17,691 | \$20,686 | 17% |
| Commercial | \$18,399 | \$20,916 | 14% |
| Industrial | \$15,309 | \$16,384 | 7% |

| Land Use | Basis | Fiscal Year 20/21 Regional Fee Rates | Updated Regional Fee Rates | Change from Current Rate |
|----------------------------------|--------------------|---|----------------------------------|-----------------------------------|
| Single Family Residential [1] | Per Unit | \$3,169 | \$3,770 | 19% |
| Multi-Family Residential | Per Unit | \$922 | \$1,095 | 19% |
| Commercial [3] | Per 1,000 SF | \$1,442 | \$1,713 | 19% |
| Industrial [4] | Per 1,000 SF | \$1,113 | \$1,053 | -5% |

TABLE 2 - Demonstrative Rates on Per Unit Basis

[1] Current assumption is 6.13 units per GDA. Proposed assumption is 5.86 units per GDA.

[2] Current assumption is 19.19 units per GDA. Proposed assumption is 18.89 units per GDA.

[3] Current assumption is 12,763 SF per acre. Proposed assumption is 12,207 SF per acre.

[4] Current assumption is 13,756 SF per acre. Proposed assumption is 15,553 SF per acre.

; and,

WHEREAS, the development impact fee will fund levee improvements that meet ULDC standards and achieve 200-year ULOP while offsetting the increase in damageable property that will be placed in the levee-protected floodplain as new development occurs in the area, and that the fee is needed to implement Phase 4 levee improvements to the Mossdale Tract and repay funds advanced by the developers and local agencies to support early implementation of the improvements; and

WHEREAS, if Council approves the Nexus Study, staff requests that City Council hold a public hearing, consider all information and public testimony and, if determined to be appropriate, adopt a resolution approving the Regional Urban Level of Flood Protection Development Levee Impact Fee in the Mossdale Tract Area, included as Attachments "B" the September 12, 2022 City Manager's Report, and the fees recommended therein. NOW, THEREFORE, BE IT RESOLVED by the City Council of Lathrop as follows:

1. The Council hereby finds that the facts set forth in the recitals to this Resolution are true and correct and establish the factual basis for the Council's adoption of this Resolution.

2. The Council based on substantial evidence in the administrative record of proceedings and pursuant to its independent review and consideration, hereby establishes the Regional Development Impact Fee for the Mossdale Tract Area, which is attached to the September 12, 2022 City Manager's Report, included as Attachment B.

3. The Mossdale Tract Area Regional Urban Level of Flood Protection Development Impact Fee shall take effect 60 days after adoption of this Resolution.

PASSED AND ADOPTED by the City Council of the City of Lathrop this 12th day of September 2022, by the following vote:

AYES:

NOES:

ABSTAIN:

ABSENT:

Sonny Dhaliwal, Mayor

SUMMARY

Overview

Larsen Wurzel & Associates, Inc. (LWA) has prepared this Mossdale Tract Area Regional Urban Level of Flood Protection Development Impact Fee Nexus Study Update (Nexus Study) for San Joaquin County, City of Lathrop, City of Manteca, and City of Stockton (collectively the Local Agencies) in coordination with the San Joaquin Area Flood Control Agency (SJAFCA). A series of levee improvements are needed to ensure that the levees surrounding the Mossdale Tract Area meet the California Department of Water Resources (DWR) Urban Levee Design Criteria (ULDC), that the flood protection system can provide an Urban Level of Flood Protection (ULOP), and the requirements of Senate Bill 5 (2007) (SB 5) can be met. This Nexus Study provides the basis for the Mossdale Tract Area Regional Levee Fee Program (Regional Levee Fee) that ensures new development pays its proportionate share of the levee improvement costs needed to provide ULOP to the Mossdale Tract Area.

Background

Senate Bill 5 (2007) and ULOP Context

SB 5 defines ULOP as the "level of protection that is necessary to withstand flooding that has a 1-in-200 chance of occurring in any given year using criteria consistent with, or developed by, the California Department of Water Resources." This bill requires all cities and counties within the Sacramento-San Joaquin Valley, as defined in California Government Code § 65007(h), to make findings related to ULOP or the national Federal Emergency Management Agency (FEMA) standard of flood protection before: (1) entering into a development agreement for any property that is located within a flood hazard zone; (2) approving a discretionary permit or other discretionary entitlement, or a ministerial permit that would result in the construction of a new residence, for a project that is located within a flood hazard zone; or (3) approving a tentative map, or a parcel map for which a tentative map was not required, for any subdivision that is located within a flood hazard zone (see California Government Code § 65865.5, 65962, and 66474.5).

Regional Levee Fee Program

The Regional Levee Fee was implemented in two steps. As described within the 2018 Adequate Progress Update prepared by LWA, the Local Agencies entered into an agreement designating SJAFCA as the Local Flood Management Agency (LFMA) responsible for planning, implementing, funding, and financing the Phase 4 levee improvements identified within the Adequate Progress Report. The Adequate Progress Report identifies several sources that would fund the Phase 4 improvements, one of which is a regional development impact fee. Before designating SJAFCA as the regional governing agency, the Cities of Lathrop and Manteca implemented interim development fee programs. In 2018, the SJAFCA structure was reorganized to include the Cities of Lathrop and Manteca and effectively becoming the regional governance entity. The Cities of Lathrop and Manteca transitioned their interim fee programs to a permanent program established and administered by SJAFCA, covering the entire Mossdale Tract Area.

Updated Regional Levee Fee Program

This Nexus Study is an update of the November 8, 2018, Mossdale Tract Area Regional Urban Level of Flood Protection Levee Impact Fee Final Nexus Study (2018 Nexus Study) prepared by LWA, formally adopted by the SJAFCA Board by Resolution Number 18-21 and effective January 8, 2019. This update reflects an updated program cost estimate that addresses climate change and updates to program funding from other sources. This Nexus Study is being prepared as a regional fee with the intent that each of the Local Agencies individually adopt the Region Levee Fee and collect and remit the fees to SJAFCA.

Authority and Procedures

Assembly Bill No. 1600: Mitigation Fee Act

This Nexus Study has been prepared to update the established Regional Levee Fee program in accordance with the provisions of the Mitigation Fee Act (AB 1600) as codified in Government Code § 66000 *et. seq.* AB 1600 sets forth the procedural requirements for establishing and collecting development impact fees. These procedures require that "a reasonable relationship," or nexus, must exist between a governmental exaction and the purpose of the condition. This Nexus Study documents that reasonable relationship between the development impact fee to be levied on each land use category and the cost of the facility improvements.

Nexus Study requirements include:

- 1. Identifying the purpose of the fee.
- 2. Identifying how the fee is to be used.
- 3. Determining that a reasonable relationship exists between the fee's use and the type of development project on which the fee is imposed.
- 4. Determining how a reasonable relationship exists between the need for the public facility and the type of development project on which the fee is imposed.
- 5. Demonstrating a reasonable relationship between the amount of the fee and the cost of the public facility attributable to the development on which the fee is imposed.

AB 1600 Requirement 1: Purpose of Fee

The Regional Impact Fee will provide funding for 200-year levee improvements in compliance with SB 5 and DWR's ULOP criteria to protect the Cities of Lathrop, Manteca, Stockton, and unincorporated portions of San Joaquin County within the Mossdale Tract Area as further described within this Nexus Study. All new planned development projects located within the area shown in **Figure 1** that lie within the Mossdale Tract Area will be subject to this Regional Levee Fee as it is adopted by each Local Agency.

AB 1600 Requirement 2: Use of the Fee

Fee revenue will be used to implement Phase 4 levee improvements to the Mossdale Tract Area as well as to repay any funds advanced by developers and Local Agencies to support early implementation of the improvements ahead of Fee payments. The improvements funded by the Fee consist of levee improvements to be implemented by SJAFCA that ensure the levees meet ULDC standards.

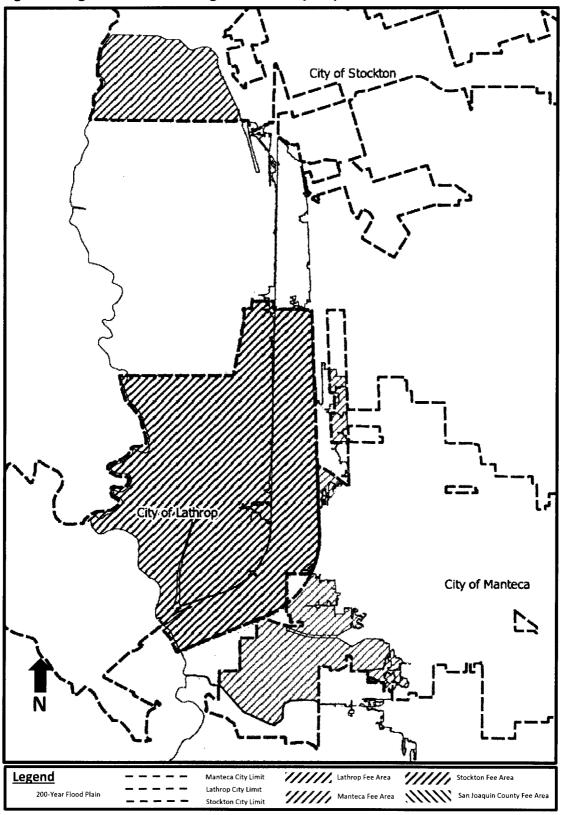

The levee improvements required for enhanced flood protection to meet the ULDC standard and achieve ULOP, including, among various other items, the following work:

- ULDC engineering analysis and identification of deficiencies
- Design and environmental evaluation of levee improvements to cure ULDC deficiencies
- Implementation of levee improvements to cure ULDC deficiencies

As previously noted, this Nexus Study provides the required findings needed to impose a development impact fee pursuant to AB 1600. AB 1600 requires that the fee is to be calculated by spreading the costs among the anticipated future development in proportion to that development's impact on the services provided. An Interim Levee Fee was imposed and collected by the Cities of Lathrop and Manteca as a condition of new development's approval. Now that SJAFCA has been designated as the regional governance entity to administer, implement, fund, and finance the needed improvements, SJAFCA requests that each of the Local Agencies approve this updated Regional Levee Fee. SJAFCA also requests that the Local Agencies collect and remit the Fees to SJAFCA to complete the necessary work.

AB 1600 Requirement 3: Relationship Between Use of Fees and Type of Development

Development of Residential, Commercial, and Industrial land uses within the Mossdale Tract Area require improved flood control and flood protection services.

Flood risk has two aspects: the probability of flooding and the consequences that follow. An area could have a high probability of flooding, but minimal consequences because it is vacant and contains no infrastructure or people. In this case, flood risk would be considered low. Conversely, a highly urbanized community that has a moderate or low probability of flooding would be considered high risk because of the greater consequences of a flood in that location (i.e., loss of life, livelihood, property, health, and human suffering). Risk can be expressed and quantified in terms of Expected Annual Damage (EAD). EAD is the product of the probability of flooding (percent chance in any given year) and consequences (dollars of damage as a result of flooding). Without mitigation, additional development increases the EAD by increasing developed property at risk. To protect life and property, it is important for the LFMA to maintain a high level of service (in terms of maintaining low flood risk) within the Mossdale Tract Area as development increases. To maintain the current level of EAD and reduce the level flood of risk to offset increased EAD, the LFMA must improve the flood protection facilities as development occurs.

Each development project will add to the necessity of flood protection due to the increased EAD as a result of that development. Additionally, each development project will benefit from the levee infrastructure already in place at the time of development. For the new development described in this Nexus Study to occur in the Mossdale Tract Area, levee improvements that meet the requirements of the ULDC are necessary.

AB 1600 Requirement 4: Relationship Between Need for Facility and Type of Development

As sated under **AB 1600 Requirement 3**, development of Residential, Commercial, and Industrial land uses within the Mossdale Tract Area require improved flood control and flood protection services to protect use and life. Each development project will add to the necessity of flood protection due to the increased EAD as a result of that development. For the new development described in this Nexus Study to occur in the Mossdale Tract Area, levee improvements that reduce the probability of flooding are necessary.

AB 1600 Requirement 5: Relationship Between Amount of Fees and Cost of Facility

This study includes the following components:

- 1. A determination of the amount of planned development upon which the costs of the fee funded facilities will be allocated.
- 2. The identification of costs associated with each improvement, facility, or program funded by the fee.
- 3. The development of a standard metric by which to proportionately allocate the costs of the facilities between land use categories based upon a damage index that considers the relative impact to EAD.
- 4. A determination of the fee cost per acre for each land use category.
- 5. A determination of the estimated fees per unit by land use category.
- 6. A discussion of how the program will be administered by the land use agencies.

The Regional Levee Fee is calculated on a gross developable acreage (GDA) basis and will be collected on a per unit basis for all types of development. All development projects within the Mossdale Tract Area are subject to the fee. To determine costs associated with the Project and the planned development upon which to allocate the costs, a planning horizon of 30 years has been assumed. The calculation and collection of the fee is assumed to occur prior to the issuance of a building permit. The details of the calculation and collection of the fee are further described within the **Fee Program Administration** section of this Nexus Study. Subsequent to the adoption of the Regional Levee Fee and this Nexus Study by the Local Agencies, each agency will further define the administrative procedures for the efficient administration, collection, and remittance of Regional Levee Fees.

Table S-1 provides a summary of the proposed initial per acre fee rates by land use category. **Table S-2** provides the estimated initial fees per unit by land use category.

Table S-1 Mossdale Tract Area: Regional ULOP Levee Impact Fee Summary of DIF Rates by Land Use Category

| Land Use | Initial Fee Rates [1] |
|---------------------------|-----------------------|
| Single-Family Residential | \$22,106 Per GDA |
| Multi-Family Residential | \$20,686 Per GDA |
| Commercial | \$20,916 Per GDA |
| Industrial | \$16,384 Per GDA |

[1] Per Gross Developable Acre (GDA). Initial Fee Rate for FY 2021/22 and 2022/23. Fee rates will increase each July 1 commencing July 1, 2023.

Assembly Bill No. 602 (2021)

Level of Service Identification Requirements

This Nexus Study has also been prepared in accordance with the provisions of Assembly Bill 602 (2021) (AB 602) as codified in Government Code § 65940.1, 66016.5, and 66019 and Health and Safety Code § 50466.5. AB 602 sets forth additional procedural requirements for the preparation of a Nexus Study and the adoption of a development impact fee. As it relates to the identification of level of service the following must be identified and provided:

- 1. The existing level of service;
- 2. The new level of service; and
- 3. An explanation of why the new level of service is appropriate.

AB 602 Requirement 1: Existing Level of Service

Currently, the existing levees protecting the Mossdale Tract Area do not meet the updated DWR ULDC standards adopted in May 2012, and the existing levees are not currently certified to provide 200-year protection. As such, the flood protection system does not provide ULOP as defined by DWR guidelines, and the land use related impacts imposed by SB 5 are in effect. A report prepared by a team of Professional Engineers led by Peterson Brustad, Inc., dated March 22, 2016 and later supplemented on June 18, 2021 to address Climate Change, outlined the deficiencies to the levee system and identified the needed improvements to meet DWR ULDC standards.

AB 602 Requirement 2: New Level of Service

The Regional Impact Fee, in combination with other funding sources being implemented by SJAFCA, will provide funding needed to improve the levee system compliant with DWR's ULDC standards. As a result of these improvements, ULOP would be achieved, and the land use restrictions would be removed.

AB 602 Requirement 3: Explanation of why the New Level of Service is Appropriate

As previously noted, SB 5 requires that all Cities and Counties within the Sacramento-San Joaquin Valley (which includes the Mossdale Tract Area) make findings related to ULOP or the national FEMA standard of flood protection before: (1) entering into a development agreement for any property that is located within a flood hazard zone; (2) approving a discretionary permit or other discretionary entitlement, or a ministerial permit that would result in the construction of a new residence, for a project that is located within a flood hazard zone; or (3) approving a tentative map, or a parcel map for which a tentative map was not required, for any subdivision that is located within a flood hazard zone. Essentially, without the ability to make these required findings, all new development and building permit issuances for residential development in the Mossdale Tract Area would halt. This would exacerbate the current housing shortage, result in declining property values overtime, and impact the economic vitality of the Mossdale Tract Area. As such, it has been determined that achieving ULOP in the Mossdale Tract Area is appropriate.

Housing Development Square Footage Basis Exemption Findings

AB 602 requires that the calculation of the fee on a housing development project be proportionate to the square footage of the proposed units of the development. A nexus study is not required to comply with this requirement if all of the following exemption findings are made:

- 1. An explanation as to why square footage is not an appropriate metric to calculate fees imposed on housing development projects.
- 2. An explanation that an alternative basis of calculating the fee bears a reasonable relationship between the fee charged and the burden posed by the development.
- 3. The other policies in the fee structure support smaller developments, or otherwise ensure that smaller development are not charged disproportionate fees.

AB 602 Exemption Finding 1: Why Square Footage is Not an Appropriate Metric

The Regional Levee Fee is to be charged on a GDA basis. The GDA metric is more appropriate than a square footage metric because it removes housing density from consideration with respect to the amount of fees charged for a development project. Because the immediate need for additional flood protection is driven in large part by the land use restrictions imposed by SB 5, the demand or necessary amount of flood protection doesn't vary with respect to the number of housing units. The restrictions on the issuance of permits for new residential dwelling units by SB 5 are imposed on any dwelling units regardless of size. Thus, there should be no functional relationship between total amount of fees collected per acre of development. Because, in general, smaller housing units tend to be developed in higher density (more units and thus a greater total amount of square feet per acre) than larger housing units (fewer units and generally less total square footage per acre), the effective per unit cost of the Regional Levee Fee will be lower on smaller homes than for larger homes. Further, the total amount of Regional Levee Fees collected per acre for higher density housing (smaller homes) would be lower as compared to a fee that would be consistent on a per square foot basis. Thus, the fees are lower for smaller housing consistent with the intent of AB 602 to make smaller housing for affordable.

AB 602 Exemption Finding 2: An Alternative Basis That Bears a Reasonable Relationship

The Regional Levee Fee is to be charged on a GDA basis. The GDA basis bears a reasonable relationship for the reasons discussed in the previous section. The immediate need for flood protection for residential development is primarily driven by the SB 5 restrictions which are not related to the size and density of development. As such, the GDA basis is more equitable as it is not functionally related to size and density of development. However, it still results in a lower effective fee rate per unit for smaller more dense development. Additionally, the methodology behind the calculation for the GDA basis, detailed in the **Regional Levee Fee Methodology** section, takes into consideration the estimated total building square feet and the resulting damageable square feet of structure per acre for each land use category. Therefore, the GDA basis still bears a reasonable relationship between the fee charged and the burden posed by the development.

AB 602 Exemption Finding 3: Avoidance of Disproportionate Fees on Smaller Developments

The GDA basis used in this Nexus study does not impose disproportionate fees on smaller development as the total amount of Regional Levee Fees charged is directly related to the total size of development project. As described above, more dense/smaller development projects will have a lower effective per unit fee than larger less dense development projects. Further, for development projects that do not require a subdivision map, as described in the **Fee Program Administration** section, the calculation of the Regional Levee Fee provides consideration for new, smaller Single-Family development on Vacant land between 0.15 acres and 5 acres by utilizing the assumed coverage ratio of a typical Single-Family home on a standard residential lot. This calculation ensures that smaller residential developments are not charged a disproportional fee in comparison to larger typical Single-Family housing development.

Additionally, subsection *For Additional Residential Development on Land with Existing Structures* under the **Fee Calculation** section, addresses relatively new amendments to California law related to development of accessory dwelling units and junior accessory dwelling units.

Procedural Requirements

It is intended that the Local Agencies will individually adopt the Regional Levee Fee program pursuant to the procedural requirements of AB 1600 and AB 602. The procedures include the following:

- Conduct a Noticed Public Hearing to Adopt the Nexus Study: Each Local Agency shall conduct a
 noticed Public Hearing, to adopt this Nexus Study, at which oral or written presentations can be made,
 this may be part of a regularly scheduled meeting or a special meeting. This public hearing shall be
 noticed at least 30 days prior in accordance with Government Code § 66016.5(a)(7).
- Conduct a Noticed Public Hearing to Adopt the Development Impact Fee: Each Local Agency shall conduct a noticed Public Hearing, to adopt the development fee associated with this Nexus Study, at which oral or written presentations can be made, as part of a regularly scheduled meeting. This public hearing shall be noticed by publication at least 10 days prior in accordance with Government Code § 6062(a). In addition, notice of the time and place of the meeting, including a general explanation of the matter to be considered, and a statement that any data required by Government Code § 66016(a) is available, shall be mailed at least 14 days prior to the meeting to any interested party who files a written request with the Local Agency for mailed notice of meetings on new or increased fees or service charges.
- **Provide Public Information**: The Local Agency shall provide public information, at least 10 days prior to the Public Hearing, including available public data indicating the amount of estimated costs required to provide the service for which the fee is to be levied.
- Adopt a Resolution or Ordinance: AB 1600 requires that any action by a local agency to levy a new fee or service charge or to approve an increase in an existing fee or service charge shall be taken only by ordinance or resolution. Each of the Local Agency City Councils are expected to adopt the fee by resolution and the County Board of Supervisors is expected to implement the fee through an amendment to their Ordinance Code.

Note that Government Code § 66017 states that fees adopted pursuant to the provisions of Government Code § 66016 (those outlined above) are effective no sooner than 60 days after final action on the adoption of the new fee or increase to an existing fee.

Land Use Categories

AB 1600 sets forth standards by which monetary exactions on development projects are measured. The need for a public facility must be reasonably related to the level of service required, which varies in proportion to a particular land use type.

The following is a list of the land use type categories utilized for the purpose of this Regional Levee Fee:

- Single-Family Residential: Includes structures that are single-family dwellings and duplexes. Condominiums, half-plexes, and rural homes are included in this category.
- **Multi-Family Residential:** Includes structures that are occupied by three or more families living independently of each other, under one roof. This category includes triplexes, four-plexes, apartment complexes.
- **Commercial:** Includes offices, retail facilities, hotels, motels, restaurants, service stations and car washes, medical and dental offices, banks, and any other development typically serving and open to the general public.
- Industrial: Includes development occupied by manufacturing, warehouses, processing plants, heavy and light industry, lumber yards, storage, bulk plants, truck transfer terminals, and any other development typically serving the manufacturing, storage, or processing industries.

Any development on Agricultural and/or Vacant land are not allocated costs due to the fact that only new urban development necessitates the need for the facilities funded by the fee as a result of increasing EAD. Further details with respect to the specifics of each land use category is discussed within the **Fee Program Implementation** and **Fee Program Administration** sections of this Nexus Study.

Mossdale Tract Area Land Uses

A central principle to determining a development impact fee is to consider the amount of anticipated future growth over the time horizon of the proposed program. In this case, the scope of facilities needed to provide ULOP within the Mossdale Tract Area are not necessarily functionally related to the amount of planned or existing development. The new facilities will provide a benefit to existing development. As described within the Adequate Progress Report, this Regional Levee Fee program is one of several sources of funding needed to construct the improvements. The facilities funded by this fee need not be allocated to existing development as a separate funding mechanism will cover the benefit received and service provided to existing development.

This fee only applies to planned development within the Mossdale Tract Area that benefits from the facilities providing ULOP. For the purposes of determining the allocation base for the fee, planned development is all development that has been identified by the land use jurisdictions and is expected to obtain a building permit after the implementation of this fee program.

Planned New Development

Planned new development within Mossdale Tract Area was estimated based on extensive research and coordination with the Local Agencies and development interests. The details of the planned development estimate over the 30-year horizon of the fee program are documented in **Appendix A**. Additional details on the approach and methodology of data collection and synthesis, as well as a detailed summary of planned development by jurisdiction, development area, and land use type, can be found in the *RD 17 Basin Financing Plan Implementation Updated Development Absorption Projections Final Updated Technical Memorandum* prepared by LWA, dated August 18, 2017 and as updated by LWA since 2017 based on actual development and input from the Local Agencies. **Table 1** provides a summary of planned new development by land use that is subject to the fee for the duration of the fee program. This table provides the total GDA by land use category as well as the total number of Single-Family and Multi-Family units and thousands of building square feet for Commercial and Industrial development. The number of units and square footage is provided as a reference for an estimate of the Regional Levee Fee cost per unit or thousand square feet.

Table 1Mossdale Tract Area: Regional ULOP Levee Impact FeePlanned Development Summary

CAPITAL IMPROVEMENTS AND PROJECTS

Capital Costs Allocable to Planned Development

As described above and within the 2016 Adequate Progress and each subsequent Annual Adequate Progress Report Update, a series of improvements are needed to ensure that the levee system meets ULDC and provides ULOP were identified. A detailed cost estimate has been prepared by an engineering team and a financing plan has been developed in support of the 2021 Adequate Progress Report Update to demonstrate how the LFMA, SJAFCA, intends to generate the funds needed to implement the levee improvement program.

The LFMA plan for flood protection through the year 2029 consists of two components; (1) RD 17's ongoing Levee Seepage Repair Project (LSRP) and (2) SJAFCA's Phase 4 Project that will achieve ULDC 200-year flood protection for the Mossdale Tract Area.

SJAFCA is implementing the Phase 4 Project in the following outlined steps:

- 1. ULDC engineering analysis and identification of deficiencies (completed March 22, 2016)
- 2. Design and environmental evaluation of levee improvements to cure ULDC deficiencies
- 3. Implementation of levee improvements to cure ULDC deficiencies

The Regional Levee Fee will only be levied on Planned Development within the Mossdale Tract Area. This means that the portion of the costs allocable to existing development will not be raised through this fee program. As described in the 2021 Adequate Progress Report Update, the LFMA has identified various other funding sources including:

- Net revenues from RD 17's existing Special Assessment District;
- A new Overlay Assessment District;
- A new Enhanced Infrastructure Financing District (EIFD); and,
- State and/or Federal grant funding opportunities

Summary of Capital Improvements Funded by the Development Impact Fee

The estimated costs for the Phase 4 Project and associated ULOP program implementation costs are shown in **Table 2** in 2021 dollars. **Appendix B** provides the discount and escalation of total SJAFCA project expenditures found in the 2021 Adequate Progress Report Update. The net costs funded by this Regional Levee Fee, along with the near-term assumptions related to the specific costs and associated fee program revenues generated through 2029 are also shown on **Table 2**. The total cost of capital improvements, repayment of the County EIFD Loan, and EIFD reimbursements to the Local Agencies total approximately \$332.8 million in 2021 dollars. Based upon the financing plan detailed within the 2021 Adequate Progress Report Update, other sources of funding are estimated to contribute approximately \$244.2 million which will fund existing development's portion of the costs of the Phase 4 Project. The remaining estimated \$88.6 million will be funded by Planned Development through this Regional Levee Fee program. This amount is used as the basis for calculating the Regional Levee Fee.

In the near term (through 2029), as detailed within the 2021 Adequate Progress Report Update and summarized in **Table 2**, the Regional Levee Fee program is expected to generate approximately \$76.2 million and cover a portion of the upfront costs of the levee improvement program.

A detailed outline of the allocated costs to each development project is identified in **Appendix A**. An estimate of the revenues generated by the Regional Levee Fee over time are included in **Appendix C**. These estimates and associated analyses support the information contained in the 2021 Adequate Progress Report Update.

Table 2Mossdale Tract Area: Regional ULOP Levee Impact FeeCost Estimate Summary & Near-Term Costs Covered by the Fee

| Item | Estimated Cost [1] |

REGIONAL LEVEE FEE METHODOLOGY

In accordance with AB 1600, a calculation of development impact fees must be accompanied by an analysis with enough detail to justify that a thorough consideration was applied in the process of determining how the fees relate to the impacts from new development. Findings must ensure that a reasonable relationship exists between the proposed fees and the development upon which they will be levied. This section describes the methodology utilized in this report in accordance with the requirements of AB 1600.

The fee methodology utilized here includes the following steps:

- 1. Qualitatively determine and describe the land use categories utilized as the basis for the fee.
- 2. Quantify the projected growth within the benefiting area in each of the land use categories in terms of GDA.
- 3. Describe and estimate the capital improvement costs and their applicability to planned new development.
- 4. Estimate the total building footprint square feet in each land use category and the resulting damageable square feet of structure per acre for each land use category.
- 5. Use the estimated damageable square feet per acre, an assumed relative structure value per structure type, and the assumed flood damage percentage to estimate the average structure damage per acre per structure type.
- 6. Use an estimated relative land value per land use category and assumed flood damage percentage to estimate an average land damage per acre per land use category.
- 7. Use the estimated structure and land damages to determine an estimated total damage per acre per land use category.
- 8. Apply a loss of use and life safety factor to adjust the total damage per acre to determine an adjusted damage per acre per land use category.
- 9. Determine a relative Property Damage Index by relating the adjusted damage per acre for each land use category to that of the adjusted damage per acre for the Single-Family Residential land use category.
- 10. Utilize the Property Damage Index to determine the adjusted equivalent acreage which represents a weighted amount of planned development acreage by land use type within the Mossdale Tract Area.
- 11. Proportionately allocate the capital improvement costs to each land use category based upon the adjusted equivalent acreage.
- 12. Determine the cost per GDA by dividing the allocated costs by the GDA of each land use category.
- 13. Add to each cost per acre the costs of administration of the fee program to determine the fee amount per acre per land use category to be collected by the land use agencies.

Cost Allocation and Calculation

The purpose of allocating the capital improvements costs among the various land uses is to provide an equitable method of funding the required improvements. The key to the cost apportionment of capital improvements to different land use types is the assumption that the benefits derived from the facilities are

related to land use type and that such benefits can be stated in relative terms. Only by relating the benefit received from the facilities and the services they provide to land use types can a reasonable nexus, or relationship, be established for the apportionment of costs to that land use.

Since the nature of the improvements in this Nexus Study relate to establishing ULOP in the Mossdale Tract Area, the equivalency factor determined in Step 9 above and utilized here is the Property Damage Index. The Property Damage Index is a relative factor that relates the adjusted property damages by land use to the property damage of an acre of Single-Family development. The greater the index value, the greater the impact in terms of property damage and loss of use and life associated with a possible flood. An index value closer to zero would indicate lower damage costs and loss of use and life associated with a flood. Given these facts, utilizing the Property Damage Index as described above is a reasonable method to allocate costs proportionately based on land use.

The following describes the series of tables that calculate the Regional Levee Fee using the method described above:

Using the estimated total building square feet and the assumed average building stories, **Table 3** determines the estimated building footprint square feet and the associated damageable square feet of structure per acre.

After calculating the damageable square feet of structure per acre for each land use category, the value is then multiplied by the relative structure value per square foot and the assumed flood damage percentage to find the average structure damage per acre, as shown in **Table 4**. The relative structure value and assumed flood damage percentage are based upon similar values utilized within the Reclamation District No. 17 Mossdale Tract Assessment Engineer's Report prepared by Kjeldsen, Sinnock & Neudeck, Inc. dated May 15, 2008. **Table 5** uses the relative land value per acre and assumed damage percentage to find the average land damage per acre. The relative land value per GDA is based upon recent land value research completed by LWA to determine equivalent land value estimates for land within the region. Information was obtained from various sources including recently completed appraisal prices for vacant land.

By summing the average structure and land damage values per acre determined in **Table 4** and **Table 5**, a total damage per acre can be determined. The total damage is then adjusted by a loss of use and life safety factor, a factor determined by how many hours per day individuals occupy structures in each land use category. This factor is multiplied by the total damage per acre to determine an adjusted damage per acre. The adjusted damage per acre amount is then used to the find the Property Damage Index or equivalency factor, as illustrated in **Table 6**.

The Property Damage Index from **Table 6** is used to determine an adjusted equivalent acreage. This amount is used to allocate the local cost to each land use category on a proportional adjusted equivalent acreage basis for each land use category. The allocated cost is then divided by the total GDA in each land use category to find the cost share per GDA. Finally, using the total local cost share and the total number of units/1,000 building square feet in **Table 7**, a demonstrative average cost per unit and cost per 1,000 building square feet can be determined.

Table 8 shows the allocated costs per GDA of the fee and the additional administrative charge of 3% to determine the total fee amount on a per GDA basis for each land use type.

Appendix C shows the cost allocated on each project based on the Planned Development description in Appendix A.

| | Gross | | | | Estimated | Damageable |

Mossdale Tract Area: Regional ULOP Levee Impact Fee Development Fee Rate Summary

Table 8

[1] Single-Family and Multi-Family shown in units; Commercial and Industrial shown in 1,000s of square feet.

Prepared by LWA

FEE PROGRAM IMPLEMENTATION

The Regional Levee Fee calculations presented in this Nexus Study are based on the best improvement cost estimates, administrative cost estimates, and land use information available at this time. If costs change significantly, if the type or amount of new projected development changes, or if other assumptions significantly change such as federal or state standards, this Nexus Study and the program should be updated accordingly.

Regional Levee Fee Collection

This Nexus Study is being prepared as a regional fee with the intent that each of the Local Agencies individually adopt the Region Levee Fee and collect and remit the fees to SJAFCA. It is expected that agreements will be entered into with the respective land use agencies in the Mossdale Tract Area to remit the Regional Levee Fee to SJAFCA to complete the Project. It is expected that subsequent to the adoption of this Nexus Study, each Local Agency will develop formal procedures needed for the efficient administration and collection of the fee. These Administrative Procedures are expected to clarify any specific conditions that would trigger the collection of the Regional Levee Fee as well as clarify the specific conditions that may exempt a property from the Regional Levee Fee as further described in the subsection **Exemptions From the Fee**, below. The procedures will also specify how the Local Agency will ensure the appropriate imposition of the fee through a development condition as well as any specifics as to the calculation and collection of the fee. The procedures will allow for variations in the method of payment as described in this section.

Fee Triggers/Applicability

The Fee will apply to all Planned Development in the Mossdale Tract Area that creates a flood protection impact. Planned Development is defined as all development that is required to obtain a building permit within the Mossdale Tract Area. Fee collection will take place prior to issuance of a building permit by the Local Agency.

Fee Collection Deferral

As stated above, Fee collection is to take place prior to the issuance of a Building Permit. Collection of the fee may be deferred beyond this point if the Local Agency has adopted an agency-wide fee deferral program applicable to all development projects. Any other deferral of Fee collection must be incorporated into a Local Agency's conditions of approval of the proposed development and/or into a development agreement or other contractual arrangement for the project. In all cases, Fee collection must take place before Final Inspection or Certificate of Occupancy as applicable.

Regional Levee Fee Program Boundary

The Regional Levee Fee calculations are based upon the total costs of the levee improvement program and estimated amount of development within the 200-year floodplain in the Mossdale Tract Area which encompasses the entire benefit area. By virtue of the cost allocation process, this Regional Levee Fee program

will generate a proportional amount of fee revenue from the share of Planned Development within each of the Local Agencies. **Figure 1** illustrates the Regional Levee Fee Program Boundary.

Exemptions From the Fee

The following land uses and/or development projects are exempt from the Regional Levee Fee:

- 1. <u>Agricultural</u>: Development projects on agricultural land including development of Rural Residential parcels greater than 5 Acres in size.
- 2. <u>Pre-Existing Structures</u>: Development projects that require a building permit and are not increasing the amount of new structure square footage are exempt from the fee if the project involves adding less than 300 new square feet. Projects adding more than 300 square feet are subject to the fee and the fee will be applicable to the additional square footage in excess of 300 new square feet.
- 3. <u>Replacement due to Damage</u>: Development projects that are a replacement, in kind, because of damage (such as fire damage or other natural disaster). Any additional square footage in excess of 300 new square feet will be subject to the fee (reference No. 2 above).
- 4. <u>Accessory Dwelling Units (ADUs)</u>: Development projects considered to be Accessory Dwelling Units by the permitting agency and are less than 750 square feet.
- 5. <u>Structures Raised Above the 200-Year Floodplain Elevation</u>: Development projects with structures raised above the 200-year flood elevation as determined by the Local Agencies or structures removed from the 200-year floodplain by flood control improvements that meet the design standards applicable to the federal-state flood control system as determined by the Local Agencies.
- 6. <u>Open Space</u>: Any development project that takes place on open space land.
- 7. <u>Public Agency Owned Land</u> (including federal, state, and local agencies): Any development project located on land owned by a government agency and is to be used solely for public use.

Exceptions to the Exemptions

With written approval from the Local Agency having jurisdiction, any or all portions of the proposed fees may be waived if it can be determined that a proposed project will not derive permanent benefit from the improvements for which the fees are collected (i.e., it can be shown that the property does not benefit from the flood protection). Written fee waivers may be available on a case-by-case basis for certain temporary structures, such as a mobile temporary structure used for construction management purposes.

Coverage Period

The Regional Levee Fee is to be collected beginning the 61st day after the adoption of the Resolution approving the fee, as adopted by the SJAFCA Board of Directors and for 30-years thereafter, unless further amended or repealed.

Administration Costs

The estimated cost of administration for the Regional Levee Fee has been included in the fee rates shown in **Table S-1**, **Table S-2** and **Table 8**. The proposed administrative fee is 3% of the cost of the fee. However, to

the extent each Local Agency has its own process for determining the administrative cost of the fee, this amount may be adjusted by each Local Agency accordingly. These administrative costs will cover the following:

- The development and administration of the Regional Levee Fee Program.
- Accounting costs associated with the Regional Levee Fee.
- Annual review of the fee program costs, fees, and policies.
- Annual reporting requirements associated with the fee program.
- Any other ongoing and recurring administrative procedures associated with the program.

Variations in Method

The Local Agencies will allow for variations in the method of fee payment, including:

- Use of any lawfully created Assessment District or Community Facilities District (CFD) to finance fee payment;
- Voluntary accelerated payment of the fee at the time of filing of any application for a tentative subdivision map, parcel map, or an earlier land use application, at the then-applicable rate; and,
- The collection of fees or other payments to fund improvements by the land use jurisdictions that are to be used by agreement to directly fund or reimburse the cost of the facilities funded by the fee.

The use of these alternative payment mechanisms and the collection of the Regional Levee Fee may vary among the Local Agencies, however, in any case, the alternative method of payment will be documented within an agreement or memorandum by the Local Agency.

Fee Credit / Reimbursement for the Design and Construction of Facilities

Developers may fund the planning, design, and construction of a portion of the facilities funded by the fee in exchange for credits against their individual project's fee obligation. In the event that a developer agrees to advance fund fees or directly plan, design, construct, and/or deliver facilities, a Local Agency will enter into a separate agreement with the developer specifying the level of fee credit, the process for receiving the credit, and the terms for utilizing the credit, in exchange for the planning, design, construction, and delivery of the facilities. In the event the value of the fee credit exceeds the Regional Levee Fee obligation and a reimbursement might be due, the agreement would also specify the specific terms upon which a reimbursement would be provided. Any fee credits and/or reimbursements will be provided in a manner consistent with SJAFCA adopted fee crediting policies. No credit for the Regional Levee Fee or reimbursement will be provided to a developer before entering into a credit and/or reimbursement agreement with the applicable Local Agency.

Refunds and Appeals Process

An applicant who has paid the Regional Levee Fee may request that such fee be refunded at any time prior to commencement of the development, although to do so would terminate any approved application or permit. Refunds will be made according to the policies and procedures of the Local Agencies and SJAFCA, as they are

developed, and may reflect deductions to compensate for handling and administrative costs incurred by the Local Agencies and SJAFCA in processing the fee calculation, collection, and refund request.

Appeals regarding the determination of the applicability and amount of the development fee are to be made in writing to the SJAFCA Executive Director. The Executive Director shall respond to the appeal request in writing within 30 days. The Executive Director's determination may be appealed to the SJAFCA Board of Directors. Any determination by the Board of Directors shall be considered final.

Annual Inflation Adjustment

The Regional Fee shall be adjusted each succeeding July 1st, commencing July 1, 2023, to reflect inflationary costs. The base fee rate shown in this study shall increase annually by the ratio which the *Engineering News Record*'s Construction Cost Index (20 Cities) for the most recent December bears to the December 2021 index.

Mossdale Tract Area: Regional ULOP Levee Impact Fee Public Draft Nexus Study May 12, 2022

FEE PROGRAM ADMINISTRATION

The following describes the general procedures for the administration of the Regional Levee Fee. Each Local Agency's staff may develop more detailed administrative procedures or implement more specific policies after the adoption of the program to more efficiently administer the program and provide needed clarification in certain circumstances.

Fee Calculation

To calculate the Regional Levee Fee the following information is required:

- Land use category of the new development
- The Gross Developable Acreage (GDA) of the New Development as defined below
- The current fee rates

The following provides detailed information on each requirement.

Land Use Categorization

Each Local Agency's respective building department will determine the correct Regional Levee Fee rate by classifying the proposed development into one of the following four land use categories:

- Single-Family Residential
- Multi-Family Residential
- Commercial
- Industrial

To classify the proposed development into one of the four land use categories, the agency will use the following information:

- The land use type from each Local Agency's zoning code that applies to the land upon which the development is proposed; and
- The descriptions of the four land use categories in this report found in the Land Use Categories discussion on Page 11.

Determining the Gross Developable Acreage (GDA) of a New Development

A GDA of a New Development, for purposes of this fee calculation, is determined as described below:

For New Development of Vacant Land

In the case where a New Development is being constructed on vacant land or land that has not previously been developed:

Residential Land Uses

- For Single-Family residential projects that consist of residential uses that require a Tentative and Final Map (i.e. more than 4 units), the GDA is the gross acreage of the large lot parcel or resulting parcels excluding major dedicated public land uses, such as major arterials, major collectors, drainage, utilities corridors, parks, schools, and other public facilities. An example calculation of GDA for this case is shown in **Appendix D**.
- For all other Single-Family residential projects that have impacts to the Mossdale Tract Area facilities the GDA is determined as follows:
 - For parcels up to 0.15 acres, the GDA is the actual acreage of the parcel.
 - For parcels greater than 0.15 acres but less than 5 acres, the acreage is based on an assumed coverage ratio of a typical Single-Family home on a standard residential lot. The GDA will be calculated by multiplying the square footage¹ of the residential structure by three and expressing this square footage in terms of acres (dividing by 43,560 square feet per acre). However, in no case will this resulting amount exceed the actual acreage of the parcel.
- For all Multi-Family residential projects, GDA is determined to be equivalent to the entire gross acreage of the parcel being developed.

Nonresidential Land Uses (Commercial and Industrial)

• For Retail/Office/Industrial/Commercial projects, GDA is determined by the actual acreage of the parcel where a structure being constructed less major dedicated public land uses, such as major arterials, major collectors, drainage, utilities corridors, parks, schools, and other public facilities.

For Development on Land with Existing or Pre-Existing Structures

In the case of expansion in excess of 300 square feet of an existing structure or the construction of a new structure within two years after demolition of a previous structure, GDA will be calculated as follows:

Residential Land Uses

- For a residential expansion project, if the project involves the addition of new square footage of 300 square feet or more, the GDA will be calculated by multiplying the square footage of the expansion in excess of 300 square feet by three then expressing this square footage in terms of acres (dividing by 43,560 square feet per acre.)
- For residential replacement projects, if the project involves development of a new residential structure after the demolition of a pre-existing structure (regardless of the use of the pre-existing structure), and the new structure is larger than the demolished structure by more than 300 square feet, the GDA will be calculated by multiplying the net new square footage in excess of 300 square

¹ Square Footage can be generally classified as all square footage of the structure excluding the square footage of garages, porches, decks, external entryways, awnings, carports, driveways, breezeways, out-buildings, carriage houses, sheds, and other similar non-habitable portion of the structure.

feet by three then expressing this square footage in terms of acres (dividing by 43,560 square feet per acre). The net new square footage in excess of 300 square feet will be determined by subtracting the documented previously existing structure square footage plus 300 square feet from the new structure square footage.

• For a residential development project that involves development of a new residential structure, separate from the existing structure, please see the follow section, For Additional Residential Development on Land with Existing Structures.

Nonresidential Land Uses

- For Retail/Office/Commercial or Industrial expansion projects, if the project involves the addition of new square footage of 300 square feet or more, the GDA will be calculated by calculating the total net new square footage in excess of 300 square feet and expressing this square footage in terms of acres (dividing by 43,560 square feet per acre).
- For Retail/Office/Commercial or Industrial replacement projects, if the project involves development of a new nonresidential structure after the demolition of a pre-existing structure (regardless of the use of the pre-existing structure) and the new structure is larger than the demolished structure by more than 300 square feet, the GDA will be calculated by calculating the total net new square footage in excess of 300 square feet and expressing this square footage in terms of acres (dividing by 43,560 square feet per acre). The net new square footage in excess of 300 square feet will be determined by subtracting the documented habitable square footage of the previously existing structure from the new square footage.
- For a Retail/Office/Commercial or Industrial project that involves development of a new nonresidential structure, separate from the existing structure, the GDA will be calculated by calculating the total net new square footage and expressing this square footage in terms of acres (dividing by 43,560 square feet per acre).

For Additional Residential Development on Land with Existing Structures

This section addresses the impacts of amendments to California law, effective January 1, 2020, related to ADUs and junior accessory dwelling units (JADUs) on Regional Impact Fee Program. Chapter 653, Statutes of 2019 (Senate Bill 13, Section 3), Chapter 655, Statutes of 2019 (Assembly Bill 68, Section 2), and Chapter 659 (Assembly Bill 881, Section 1.5 and 2.5) build upon recent changes to ADU and JADU law (Government Code Section 65852.2, 65852.22 and Health & Safety Code Section 17980.12), collectively "ADU Law", and further address barriers to the development of ADUs and JADUs.

This section relies on the information provided in the State of California – Business, Consumer Services, and Housing Agency, Department of Housing and Community Development, Division of Housing Policy Development memorandum issued by Zachary Olmstead, Deputy Director, dated January 10, 2020, regarding Local Agency Accessory Dwelling Units. The State of California memorandum is attached hereto for reference.

The ADU Law impacts the Regional Levee Fee by requiring new exemptions or limitations based on the size of an ADU. The ADU Law requires that ADUs up to 750 square feet be exempt from impact fees and impact fees

for an ADU of 750 square feet or larger be proportional to the relationship of the ADU to the primary dwelling unit (Government Code § 65852.2 (f)(3)).

Residential Accessory Dwelling Units

- For ADUs and JADUs less than 750 square feet, the Regional Levee Fee will not be collected.
- For ADUs of 750 square feet or more, the Fee will be calculated proportionately in relation to the square footage of the primary dwelling unit. First the fee for the existing primary residence needs to be calculated, then the proportionate fee for the ADU will be calculated using this information.

 Table 9 provides example ADU calculations based on the Single-Family Residential (SFR) Fee rate per GDA calculated in this Nexus Study.

| Table 9 |
|---|
| Mossdale Tract Area: Regional ULOP Levee Impact Fee |
| Example ADU Fee Calculations |

| Description | Formula | Example 1 [1] | Example 2 | Example 3 | Example 4 | Example 5 |
|------------------------|------------|---------------|--------------------|--------------------|--------------------|--------------------|
| Existing Residence | | | | | | |
| SFR Fee Rate | ۷ | \$22,105.73 | \$22,105.73 | \$22,105.73 | \$22,105.73 | \$22,105.73 |
| Acres | в | 0.16 | 0.16 | 0.16 | 0.25 | 0.25 |
| Square Feet | υ | 1,500 | 1,500 | 1,500 | 2,500 | 2,500 |
| Existing Residence Fee | D = A*B | \$3,536.91 | \$3,536.91 | \$3,536.91 | \$5,526.4 3 | \$5,526.43 |
| New ADU | | | | | | |
| Square Feet | ш | 700 | 006 | 1,200 | 1,200 | 006 |
| Ratio to Existing | F = E/C | N/A | 09.0 | 0.80 | 0.48 | 0.36 |
| New ADU Fee | $G = D^*F$ | \$0.00 | \$2,122.14 | \$2,829.52 | \$2,652.68 | \$1,989.51 |

[1] ADU is less than 750 square feet and therefore is exempt from the Fee.

Calculation Steps

The following steps are required to calculate the development fee:

- 1. Determine the land use category based on the characteristics of the New Develop and the descriptions of the land use categories.
- 2. Determine the GDA of the New Development using the definition of GDA above.
- 3. Determine the total Regional Levee Fee by multiply the fee rate from step 1 and the GDA from step 2.

This is the fee applicable to the New Development.

Per Unit Fee Collection for Single-Family Residential Development

The above steps describe the calculation of the Regional Levee Fee on a New Development basis. In the case where a New Development is for subdivision of Single-Family Residential units and the fee has been calculated for an entire subdivision, the fee may be collected at the issuance of each building permit (and deferred to Final Inspection) for each residential unit. In this case, each Local Agency will determine the per unit GDA by dividing the GDA of the entire subdivision by the number of Single-Family units in the subdivision. This resulting per unit GDA will be multiplied by the current fee rate at the time of payment to determine the per unit fee cost.

Fee Revenue Accounting

The revenues raised by payment of the Regional Levee Fee shall be placed in a separate fund established by the SJAFCA (the Regional Levee Fee Fund). Separate and special accounts may be established in the Regional Levee Fee Fund and used to account for collected revenues, along with any interest earnings. Each Local Agency will remit the collected funds to SJAFCA pursuant to the terms of the collection agreement executed between SJAFCA and the Local Agency.

Periodic Review and Cost Adjustment

SJAFCA will periodically review actual project costs and Regional Levee Fee collections to determine if any updates to the program are warranted. The periodic review will occur no less than every eight years. During these reviews, the following aspects will be analyzed:

- Changes to the Improvements to be funded by the Regional Levee Fee program
- Changes in the cost to update or administer the Regional Levee Fee program
- Changes in annual financing costs
- Changes in assumed land uses
- Changes in other funding sources

Any changes to the Regional Levee Fee based on the periodic update will be presented to the Local Agency's Board for approval before an increase of the fee will take effect.

Pursuant to Government Code § 66001(d), the fifth fiscal year following the first deposit into the fee account or fund, and annually thereafter, each Local Agency is required to make all the following findings about that portion of the account or fund remaining unexpended:

- Identify the purpose for which the fee is to be used.
- Demonstrate a reasonable relationship between the fee and the purpose for which it is charged.
- Identify all sources and amounts of funding anticipated to fulfill the Phase 4 improvements.
- Designate the approximate dates that the funding referred to in the above paragraph is expected to be deposited in the appropriate account or fund.

SJAFCA must refund the unexpended or uncommitted revenue portion for which a need could not be demonstrated in the above findings unless the administrative costs exceed the amount of the refund.

Mossdale Tract Area: Regional ULOP Levee Impact Fee Public Draft Nexus Study May 12, 2022

NEXUS FINDINGS

Authority

This report has been prepared in support of the Regional Levee Fee in accordance with the procedural guidelines established in AB 1600, codified in California Government § 66000 et. seq. This code section sets forth the procedural requirements for establishing and collecting development impact fees. The procedures require that a "reasonable relationship or nexus must exist between a governmental exaction and the purpose of the condition."

Specifically, each Local Agency imposing a fee must:

- 1. Identifying the purpose of the fee.
- 2. Identifying how the fee is to be used.
- 3. Determining that a reasonable relationship exists between the fee's use and the type of development project on which the fee is imposed.
- 4. Determining how a reasonable relationship exists between the need for the public facility and the type of development project on which the fee is imposed.
- 5. Demonstrating a reasonable relationship between the amount of the fee and the cost of the public facility attributable to the development on which the fee is imposed.

Summary of Nexus Findings

The Regional Levee Fee to be collected by each Local Agency is calculated based on applicability of planned new development to the capital improvement project and standardized acreage proportion of the land use category to the total cost of the improvement. With this approach, the following findings are made regarding the Regional Levee Fee.

Requirement 1: Purpose of Fee

The capital improvements funded by the Regional Levee Fee are necessary to serve new Residential, Commercial, and Industrial development as described in the *2016 Adequate Progress Report* and each subsequent Annual Adequate Progress Report Update.

Requirement 2: Use of the Fee

The Regional Levee Fee will be used to design and construct levee improvements that meet ULDC standards to provide ULOP for the Mossdale Tract Area as further described in the 2016 Adequate Progress Report and each subsequent Annual Adequate Progress Report Update approved by SJAFCA.

Requirement 3: Relationship Between Use of Fees and Type of Development

Development of Residential, Commercial, and Industrial land uses within the Mossdale Tract Area will require improved flood control and flood protection services. This Regional Levee Fee, in conjunction with other funding sources, will fund the improved SJAFCA flood protection system that will provide ULOP.

Requirement 4: Relationship Between Need for Facility and Type of Development

Each Residential, Commercial, and Industrial development project adds to the incremental need for flood protection because of the increase in damage that would occur as a result of an uncontrolled flood, and the increased burden that the damages will place on the Local Agencies and SJAFCA. For the new development described in this Nexus Study to occur within the Mossdale Tract Area, the level of flood control needs to be improved to provide ULOP to the Area.

Requirement 5: Relationship Between Amount of Fees and Cost of Facility

The appropriate common use factor for allocating costs to each land use is the Relative Property Damage Index. **Table 6** shows the respective Relative Property Damage Index for each land use.

SJAFCA, acting as LFMA has estimated the total cost of the required facilities. The allocation of the costs based on the acres adjusted by the Property Damage Index has been presented in **Table 7**. The result is the cost of the improvements attributed to each acre of Residential, Commercial, and Industrial development. This allocation demonstrates the relationship between the amount of fee and the cost of the portion of the facility attributed to the specific type of development upon which the fee is imposed.

APPENDIX A – PLANNED DEVELOPMENT DETAILS

Summary of Planned Development

- Development that is expected to take place over the next 30-years is subject to the Fee. Development
 projections through 2060, as described in the RD 17 Basin Financing Plan Implementation Updated
 Development Absorption Projections Final Updated Technical Memorandum prepared by LWA, dated
 August 18, 2017, and as updated by LWA since 2017 based on actual development and input from the
 Local Agencies, have been utilized to determine the amount of development expected to take place over
 the next 30-years.
- 2. The Mossdale Tract Area includes over 6,345 acres of highly developed agricultural lands that produce a variety of crops. The basin also includes urban areas within San Joaquin County, the Cities of Lathrop, Manteca, and Stockton, and the urbanizing areas between these cities (as shown in Figure 1). The area subject to the Regional Levee Fee is expected to increase by approximately 1,766 Single-Family GDA, 139 Multi-Family GDA, 1,274 Commercial GDA, and 1,543 Industrial GDA over the ensuing 30-Years (Table A1).
- 3. Growth in the City of Lathrop subject to the Regional Levee Fee is expected to amount to approximately 775 Single-Family GDA, 47 Multi-Family GDA, 496 Commercial GDA, and 724 Industrial GDA.
- 4. Growth in the City of Manteca subject to the Regional Levee Fee is expected to amount to approximately 793 Single-Family GDA, 39 Multi-Family GDA, 359 Commercial GDA, and 391 Industrial GDA.
- Growth in the City of Stockton subject to the Regional Levee Fee is expected to amount to approximately
 Single-Family GDA, 53 Multi-Family GDA, 127 Commercial GDA, and 214 Industrial GDA.
- 6. Growth within the currently unincorporated portions of San Joaquin County that would ultimately be annexed into one of the Cities that would be subject to the Regional Levee Fee is estimated as follows. As described further below, assumptions were made in order to estimate the amount of development that would occur outside of the current City limits.
 - a. City of Lathrop to annex 24 Commercial GDA.
 - b. City of Manteca to annex 141 Single-Family GDA, 28 Commercial GDA, and 137 Industrial GDA.
 - c. City of Stockton to annex 178 Commercial GDA.

City of Lathrop

Active projects on vacant parcels identified by City staff include Central Lathrop Specific Plan, Crossroads/Industrial, Gateway, South Lathrop Specific Plan, East Lathrop, Mossdale Landing, Mossdale Landing East, Mossdale Landing South, and Sharpe Depot. PDFs and excel files that analyze development potential, undeveloped properties, and land use were provided by City staff to summarize total developable acreage for each project. City of Lathrop staff identified the potential for future development outside of the current City limits. Specific development projects have not been identified.

City of Manteca

Active projects on vacant parcels identified by City staff include Airport/Daniels, Alma Apartments, Center Point South, Cerri, Denali, Embarcadero, Family Entertainment Zone, HWY 120, Kiper, Lewis Estates, Oakwood Trails, Oleander, Railroad Industrial, Sundance, Telles & Wilson, Terra Ranch, The Trails of Manteca, Villa Ticino

West, Wackerly, Yosemite Greens, and Yosemite/Fishback. Land use summaries were provided by City staff to summarize total developable acreage by project. City of Lathrop staff identified the potential for future development outside of the current City limits. Specific development projects have not been identified.

City of Stockton

Active projects on vacant parcels identified by City staff include the undeveloped portions of Weston Ranch and South Airport. City of Stockton staff identified the potential for future development outside of the current City limits. The City of Stockton is currently updating its General Plan and the General Plan will need to conform to the requirements of the Delta Plan. Specific development projects have not been identified. Assumptions were made regarding the amount of development outside of the City limits and these assumptions have been reviewed by stakeholders working on the development of Adequate Progress Reports. It is expected that as the City of Stockton finalizes its General Plan update and additional information is obtained over time, future updates of this report will reflect new information.

[1] Represents the additional EIFD allocation above the base County allocation of 10 percent eligible for repayment.

[2] Assumed 3 percent annual interest rate reflective of 2 percent plus the annual County treasury yield (estimated at 1%) applied to the prior year ending balance.

[3] Represents development impact fee revenue for all development within the Mossdale Tract boundaries as estimated by LWA included in Appendix A.

APPENDIX D – EXAMPLE GROSS DEVELOPABLE ACREAGE CALCULATION

For this example calculation, the Gross Developable Acreage (GDA) for Lot 1–B on the attached Maps is calculated.

Map D-1 shows the overall tentative map for the "Wheeler Ranch" project. **Map D-2** is an enlargement of Lot 1–B with an indication of acreage to be subtracted from the large lot map when determining GDA. Note: For purposes of the fee calculation, the City may require the small lot final map to provide a calculation of GDA.

STEP 1

Goal: From the tentative map, determine the gross acreage for the large lot.

Solution: In this case, the gross acreage for the large lot by the unit is given in the land use table. Lot 1-B's gross acreage is stated as 38.3 acres. This includes the allocable portion of parks/open space that is not indicated as its own unit, as well as major collectors and arterials.

STEP 2

Goal: Subtract all acreage in Major Roads, Parks, Open Space, and other property that will ultimately be publicly owned.

Solution: In this case, the densities indicated in the land use table, based on the note, exclude the allocable area of arterials and collector streets. If the density is divided by the number of units, the result is the acreage of the unit without allocable major roads.

Lot 1–B has 147 lots, and a density of 4.1 units/acre.

147/4.1 = 35.9 acres. Therefore, there were 2.4 acres of major roads included in the unit acreage stated in the land use table (38.3 acres - 35.9 acres = 2.4 acres).

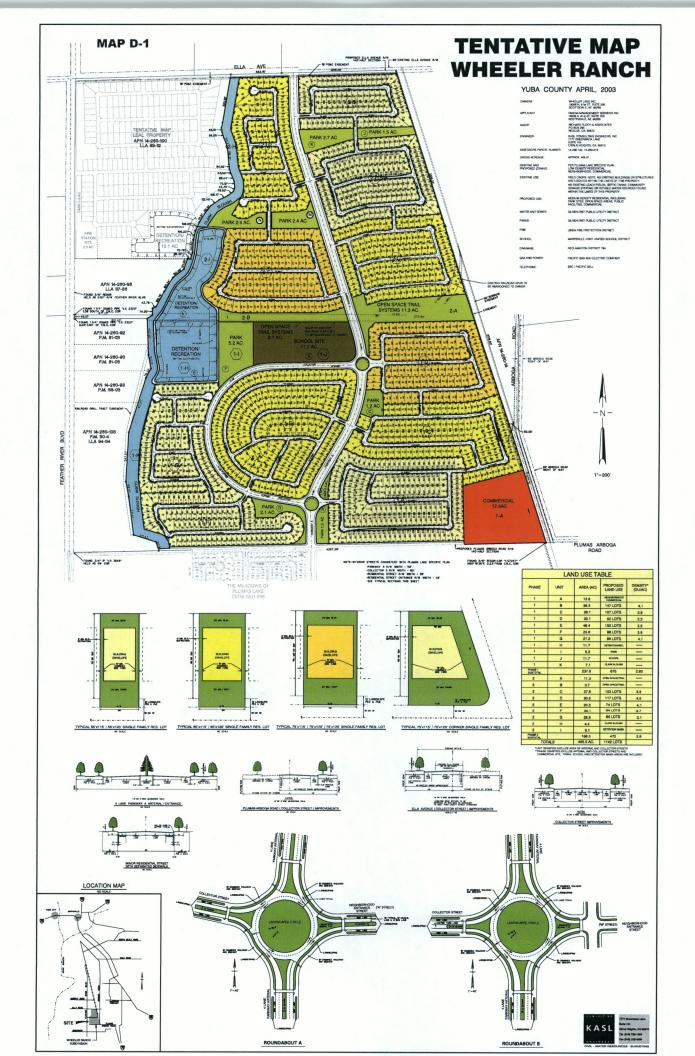

Subtract all open space. Lot 1–B includes two park areas: one of 1.3 acres and one of 0.5 acres.

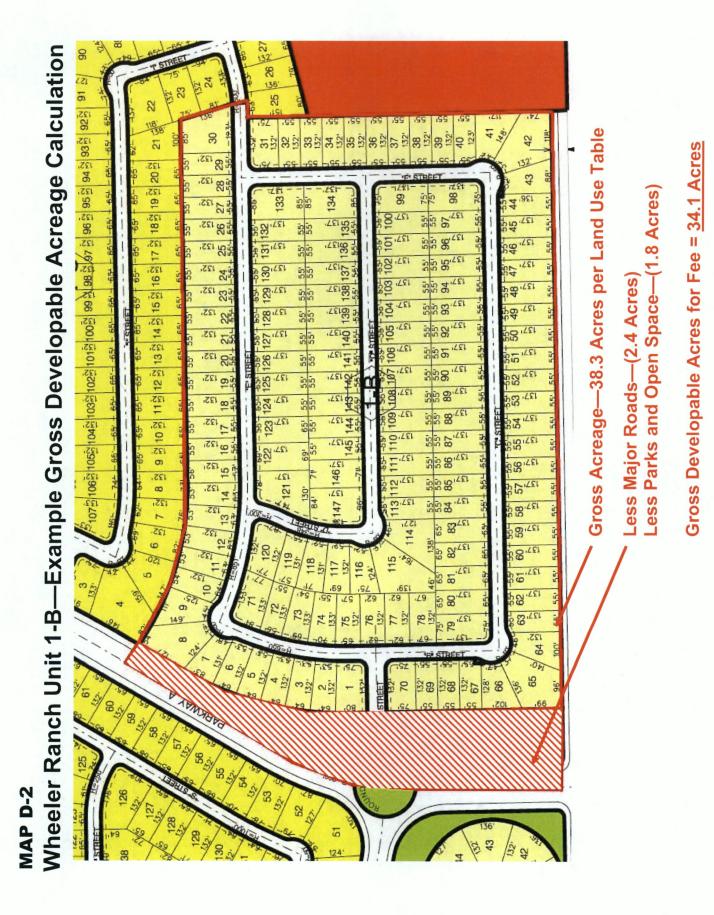

35.9 acres - (1.3 acres + 0.5 acres) = 34.1 acres.

No additional ultimately publicly owned property is remaining in the Lot; therefore, the GDA for Lot 1–B is 34.1 acres.

Furthermore, the GDA per unit is 0.232. This is the "Project" acreage to be used for determining the Per Unit Fee Rate for each Levee Fee charged at Building Permit.
